Vedic Delivers full CRM & Offshoring integration

Stem Overview: Vedic is a fully integrated and customized CRM & Offshoring platform developed in response to user and client based request for an Upwork and Salesforce alternative with ease of use and small business owners in mind. The platform leverages cryptographic security mechanisms employed in distributed ledger technologies to ensure that data cannot be tampered with, while allowing users full control over how their data is stored and shared. The system is user-friendly for applicants while adhering to strict AML policy guidelines.

Vedic integrates traditional CRM and Offshoring functionality with state-of-the-art data protection and ease of use modifications based on blockchain technology. To safeguard against ID theft, false registrations, Sybil attacks and other attacks which compromise and circumvent compliance; Vedic has partner with Ocular. Vedic also uses advanced technologies such as artificial intelligence (AI) and machine learning. These capabilities enable Vedic to dynamically monitor and upgrade its capabilities and defenses in the face of an ever-changing landscape of cybersecurity while ensuring customer satisfaction .

THE TOTAL BUSINESS CRM & OFFSHORING PACKAGE—END-TO-END SOLUTION FOR YOU AND YOUR COMPANY

Regulatory Challenges - Governments, banks and regulators worldwide require enhanced and ongoing verification of "customers" and the "customer's, customers." Today, the process is cumbersome and time consuming - delaying the ability to conduct business.

Customer Acquisition (sign-up) Companies have trouble following regulations and processing customers quickly. The result is a backlog of registrations. The companies must grind through stacks of regulations or worse, ignore them altogether.
